

The Revenue & Profit Operating System

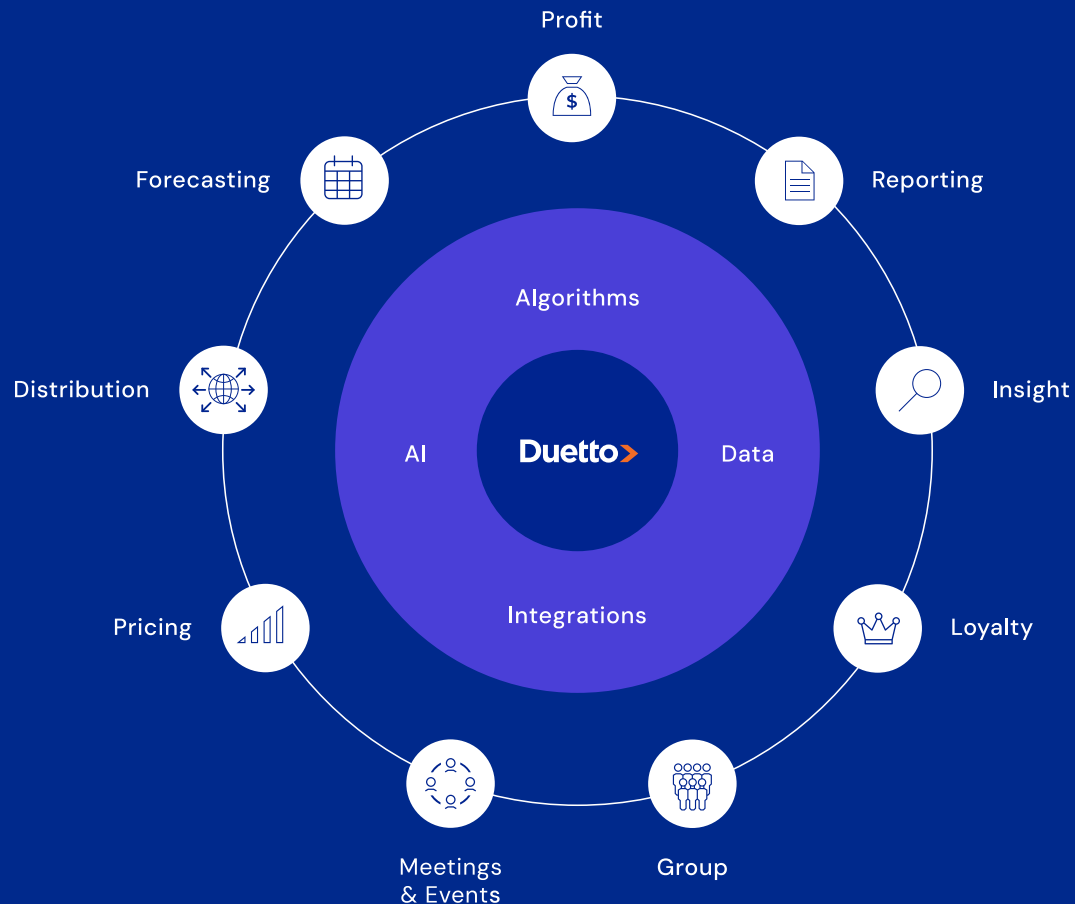

Everything your RMS should be

What is the Revenue & Profit Operating System?

The Revenue & Profit Operating System (RP-OS) is the world's first platform that brings every element of hotel revenue strategy together in one place. Built for a new era of volatility, complexity, and accelerated expectations, RP-OS is designed to help hotels think faster, move smarter, and grow more profitably.

This is more than just the next evolution of RMS.

It's a category-defining platform built to meet the needs of every commercial leader in hospitality today.

The Revenue & Profit Operating System

An Operating System for the Entire Revenue Ecosystem

At the heart of RP-OS are Duetto's powerful algorithms, driven by 1st and 3rd party data, AI, and integrations across your tech stack. It connects:

Pricing – Dynamic open pricing that adapts to market shifts.

Forecasting – Intelligent, real-time forecasting models.

Reporting – Actionable insight across all segments.

Profit – Profitability insights, benchmarking & market intelligence via HotStats

Distribution – Optimize channels and boost net ADR.

Loyalty – Dynamic personalized pricing for loyalty members.

Group & Events – Seamless revenue strategy across transient, group, and meetings.

This isn't just a tool for revenue leaders – it empowers GMs, asset managers, commercial teams, and owners to make smarter, faster, more aligned decisions.

The Revenue & Profit Operating System

Why It Matters

Revenue Management has become a multidimensional function.

Guest behavior is changing.

Costs are rising.

Markets are volatile.

And tech expectations have evolved.

RP-OS helps teams

- Connect all revenue streams (not just rooms)
- Gain clarity over topline and bottom-line performance
- Replace static tools with real-time, predictive automation
- Make smarter calls, faster
- Share data across departments, implement cross-functional teams and create a more unified environment to meet revenue and profit goals
